EXTRICATION, INC.

(Non-Profit 501©3 Organization)

HELP SAVE LIVES . . .

DONATE YOUR VEHICLE!

Traffic crashes are the leading cause of death for children. As a result of vehicle collisions in Wisconsin, it is estimated that someone is injured every 8.3 minutes. Advanced rescue techniques are crucial to reducing suffering, serious injury, permanent disability and death. Emergency personnel must be properly trained to save those precious seconds that can mean the difference between life and death.

Safe And Fast Extrication, Inc. is dedicated to saving lives and reducing the suffering of victims by bringing qualified, trained and certified rescue personnel to the scene of a vehicle collision.

SAFE is currently training fire departments in Waukesha County on advanced vehicle rescue techniques used to remove injured victims entrapped in their vehicle.

The Medical College of Wisconsin and **SAFE** are working together to provide an expert forum and state of the art vehicle crash extrication research laboratory. This laboratory consists of approximately 30,000 square feet of space with a full scale vehicle crash research facility. This collaborative research and development is a vital component needed for gathering information and the implementation of a uniform state of the art vehicle extrication program.

SAFE is a 501©3 non-profit organization that needs your help... Please consider donating your vehicle! Make a tax deductible contribution that saves lives!! **J & J Towing and Recovery, Inc.** has volunteered to transport your vehicle to the training site at no cost to you.
